OCTANE ADVANTAGES

one machine

Adjustable incline

Advanced training

30:30 and MMA

Workout Boosters

Adjustable stride length

SmartStride® technology

 Replaces adaptations of ellipticals and non-elliptical modalities in

Octane

XTOne

The cross trainer that does it all. The XT-One is an all-in-one machine that lets exercisers walk, run, hike or climb to target different muscles for customized effectiveness. Created with premium materials and innovative design, this elliptical will stand up to every workout while fueling performance and delivering results. Octane Fitness ellipticals give exercisers the ability to challenge themselves with intense workouts, yet still feel good both during and after their routines.

WALK

The biomechanically precise motion of the XT-One machine delivers a low-impact, comfortable walk, with a choice of shorter or longer strides to custom-fit exercisers with different leg lengths.

RUN

Exercisers can change pace or stride length to customize their run motion. Or they can take advantage of SmartStride* interactive ergonomics, which replicate jogging or running by automatically adjusting the stride length from 20"-28" based on the user's pace.

HIKE

Hit the hills and boost cardiovascular and muscular endurance by selecting from 10 incline levels that target the legs and work the upper body and core. Users can opt for greater challenges with several incline workouts, including Mountain Peak and Progressive Hill.

CLIMB

The ultimate challenge with a steep climb that strengthens the quads, glutes and hamstrings with deep strides and high-intensity cardio and strength work.
